

Please amend claim 1 to read as follows:

1 1. (Twice Amended) An interactive computer controlled
2 display system with speech command input recognition
3 comprising:

4 means for predetermining a plurality of speech commands
5 for respectively initiating each of a corresponding
6 plurality of system actions,

7 means for providing for each of said plurality of
8 commands, an associated set of non-command speech terms,
9 each term having relevance to its associated command,

10 means for detecting speech command and non-command
11 speech terms,

12 means responsive to a detected speech command for
13 displaying said command, and

14 means responsive to a detected non-command speech term
15 having relevance to one of said commands for displaying the
16 relevant command simultaneously with said detected speech
17 command.

Please amend claim 6 to read as follows:

1 6. (Twice Amended) A method for providing speech command
2 input to an interactive computer controlled display system
3 with speech command input recognition comprising:
4 predetermining a plurality of speech commands for
5 respectively initiating each of a corresponding plurality of
6 system actions,

7 providing for each of said plurality of commands, an
8 associated set of non-command speech terms, each term having
9 relevance to its associated command,

10 detecting speech command and non-command speech terms,
11 displaying a speech command responsive to its detection
12 as a speech command, and

13 responsive to a detected non-command speech term having
14 relevance to one of said commands displaying the relevant
15 command simultaneously with said detected speech command.

Please amend claim 11 to read as follows:

1 11. (Twice Amended) A computer program having program code
2 included on a computer readable medium for speech command
3 input recognition in an interactive computer controlled
4 display system comprising:

5 means for predetermining a plurality of speech commands
6 for respectively initiating each of a corresponding
7 plurality of system actions,

8 means for providing for each of said plurality of
9 commands, an associated set of non-command speech terms,
10 each term having relevance to its associated command,

11 means for detecting speech command and non-command
12 speech terms,

13 means responsive to a detected speech command for
14 displaying said command, and

15 means responsive to a detected non-command speech term
16 having relevance to one of said commands for displaying the
17 relevant command simultaneously with said detected speech
18 command.
